Financial Management - 2015

International Financial Management - Jeff Madura 2021

International Financial Management - Göran Bergendahl 1982-12-12

International Financial and Managerial Accounting - Ahmed Riahi-Belkaoui 2002 A probing investigation of the accounting problems that have the most notable impact on the efficient management of multinational firms, focusing on their normative as well as descriptive solutions.

The Theory and Practice of International Financial Management - Reid
Multinational Finance - Adrian Buckley 1996 A complete, fully up-to-date course in international finance. Covers every important aspect of international finance, including foreign exchange rates, markets and theories, exposure management and hedging techniques; swaps, financial futures, and derivatives; international capital budgeting; debt instruments and additional aspects of international financing, and other important issues. Thoroughly revised and restructured, with new exercises and selected solutions. Undergraduate and postgraduate courses in international financial management or financial markets and investments.

International Business - Betty Jane Punnett 1992 This book takes a managerial approach to multinational companies and looks at social, political and business cultures around the world. The discussions are oriented toward business, rather than towards economics or theory. The text includes examples of business blunders that illustrate what to avoid when competing internationally. A four colour acetate map insert shows readers the interrelationship of the world’s countries and their economic status.

International Financial Management - David B. ZenoFF, Jack ZwICK 1969

Business Administration Reading Lists and Course Outlines: International banking and finance - 1981

Contemporary Financial Management - R. Charles Moyer 1998 The 7th edition of this successful text provides a comprehensive, correct, and contemporary introduction to financial management, incorporating recent changes in the financial operation of firms: the increased focus on shareholder wealth maximization and cash flow management, an emphasis on international aspects of financial management, a concern for the ethical behavior of managers, and a reflection of the increased impact of the Internet in business practice.

International Financial Management - Charles N. Henning 1978

International Finance - James Calvin Baker 1998 This comprehensive volume covers specific aspects of international finance that should be of importance to multinational corporations. It discusses the methods of financial management of international corporations doing business across borders throughout the world.

Financing International Business Operations - James Calvin Baker 1971

Foundations of Financial Management - Stanley B. Block 1999

Fundamentals of Multinational Finance - Eugene F. Brigham 1999 Intended for use in an introductory finance course, this textbook emphasizes the skills needed to make good financial decisions. It outlines fundamental concepts and provides detailed discussions of topics like securities, corporate valuation, strategic investment, and working capital management. Two CD-ROMs contain displays, tools kits, models, files, spreadsheets, and reference materials. Brigham teaches at the University of Florida. Ehrhardt teaches at the University of Tennessee. Distributed by ISBS, c. Book News Inc.

Multinational Finance - Kirt C. Butler 2012-08-28 An in-depth treatment of the international financial arena Multinational Finance, Fifth Edition assumes the viewpoint of the financial manager of a multinational corporation with investment or financial operations in more than one country. This book provides a framework for evaluating the many opportunities, costs, and risks of multinational operations in a manner that allows readers to see beyond the math and terminology surrounding this field to realize the general principles of multinational financial management. Logically organized and written in a clear, non-technical style, this book includes information on international finance topics such as foreign exchange, currency and derivatives markets, currency risk (transaction, operating, and translation) management, country risk, international taxation, capital structure, cost of capital, and international portfolio diversification. It also offers unique chapters on multinational treasury management, the rationale for hedging currency risks, options on real assets, international corporate governance, asset pricing, and portfolio management. Emphasizes the managerial aspects of multinational finance with graphs, figures, and the use of numerous real-world examples Expands on the treatment of parity disequilibria to include exchange rate expectations that differ from parity and a project’s operating exposure to currency risk Provides an overview and comparison of the various derivative instruments and their use in risk hedging Contains valuable insights on valuation and management of a multinational corporation’s investments If you’re looking for the best way to gain a firm understanding of multinational finance, look no further than the fifth edition of this classic text.

Global Business - Daniel Johannes Venter 2007 This book aims to increase the understanding of global business issues and helps to develop a global business mindset for managers of small, medium and large companies.

International Finance - Maurice D. Levi 1996 Intended for students who already have a basic knowledge of economics, this book is written from the perspective of someone who wishes to learn about the financial management of an internationally oriented business.

International Financial Management - Geert Bekaert 2009 International Financial Management equips future business leaders with the tools they need to succeed in a competitive global environment. This new text by leading international scholars Bekaert and Hodrick blends theory, the analysis of data, examples, and practical case situations to allow students to truly understand what to do when confronted with an international financial decision and why that decision is correct.

Fundamentals of Multinational Finance - Michael H. Moffett 2006 Written for the undergraduate student, Fundamentals of Multinational Finance, Second Edition is a focused, streamlined adaptation of the market-leading classic, Multinational Business Finance. Committed to preparing the leaders of tomorrow’s multinational enterprises, the authors have included numerous mini-cases and real-world examples to teach students to recognize the challenges and benefit from the opportunities inherent in modern global markets. Lucid explanations and engaging vignettes are rendered in the authoritative voice of the best-selling authors.

Accounting - Helen Morsicato Gerson 2001 Accounting: An International Perspective, 5e was written for two primary markets; upper level accounting and MBA Accounting. The Gerson-Meek text could be used in an advanced accounting course where the international coverage in the main text is either weak or out of date; in a topics seminar where international accounting is being covered in 3 or 4 weeks; and in an international accounting course where the focus is on cases and the instructor wants a brief text to be used as a reference. At the MBA level Gerson-Meek will fit nicely into an eight-week international accounting course or any MBA course where the professor wants more current international coverage. This paper bound text is designed to supplement upper level and MBA accounting texts with additional mini-cases and readings covering international accounting concepts. The book provides a general, non-technical overview of international accounting and covers both financial and managerial accounting topics. Recognizing that this is a supplemental text, the authors have re-organized the fifth edition by decreasing the length from 12 chapters to 10 chapters.
